

Elster AMCO Water continues to enhance the user benefits of the evoQ₄ with the addition of New Product Line Features:

- FM approval on sizes 3" through 8"
- Elster Protocol Encoder Output for:
 - Touch Read
 - Automated Metering Reading
- 1.5" Mag Meter version

Future Developments Include:

- Sensus Protocol Beta April, 2009
- 10" & 12" versions Beta April, 2009

Embedded with sophisticated technology that provides high accuracy through a wide range of flows, **evoQ₄** is one meter that meets the needs of four traditional commercial meters – Compounds, Turbines, Single Jets, and Mag Meters. With **evoQ₄**, water utilities are empowered to manage water resources wisely while simultaneously adding other measurable benefits to their business such as reducing overall operating expenses, and protecting and enhancing revenue.

Designed without moving parts and a 10-year battery life, the maintenance-free **evoQ₄** eliminates the need for regular battery change-outs and the calibration often required with mechanical and electromagnetic meters. Accurate, reliable, lead free and fully submersible, the **evoQ₄** delivers unparalleled levels of performance.

**FM
APPROVED**

evoQ₄ Mag Meter
Heavy on Performance,
Light on Your Budget

The **evoQ₄** has a total life cycle cost that is far less than its competition, yet delivers unprecedented features and performance with FM approval for fire service applications.

Benefits:

- Lightest FM approved meter on the market
- No strainer required
- No moving parts
- 10-year maintenance free life
- Available with encoder or pulse output
